

Data Protection – Data Breach Policy

Last Review : Jan 2026

Committee: F&A

Date Ratified: Jan 2026

1. Introduction

Oldfield School issues this policy to meet the requirements incumbent upon them under the Data Protection Act 2018 for the handling of personal data in its role as a data controller, such personal data is a valuable asset and needs to be suitably protected.

Appropriate measures are implemented to protect personal data from incidents (either deliberately or accidentally) to avoid a data protection breach that could compromise security.

A data breach is defined as the compromise of information's confidentiality, integrity, or availability which may result in harm to individual(s), reputational damage, detrimental effect on service provision, legislative non-compliance, and/or financial costs.

2. Scope

This policy applies to all employees of Oldfield School including contract, agency and temporary staff, volunteers and employees of partner organisations working for Oldfield School.

3. Data Breaches

For the purposes of this policy data breaches will include both suspected and confirmed incidents. An incident can include, but is not limited to:

- Loss or theft of confidential or sensitive data or equipment on which such data is stored (*e.g. loss of laptop, USB stick, iPad/tablet device, paper record, or access badge*)
- Equipment failure (*where this leads to accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data*)
- Unauthorised use of, access to or modification of data or information systems
- Attempts (failed or successful) to gain unauthorised access to information or IT system(s)
- Unauthorised disclosure of sensitive / confidential data (*e.g. login details, emails to the wrong recipient, not using BCC, post to the wrong address*)
- Website defacement
- Hacking attack
- Unforeseen circumstances (*where this leads to accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data*) such as a fire or flood
- Human error
- Breaches of policy such as
 - Server Room door left open
 - Filing cabinets left unlocked

- Temporary loss / misplacement of confidential or sensitive data or equipment on which such data is stored (*e.g. loss of laptop, USB stick, iPad/tablet device, paper record, or access badge*)

Near misses can include, but are not limited to, scenarios such as emails sent to the wrong recipient where a non-delivery report bounces back.

4. Reporting

The quick response to a suspected or actual data breach is key. When a security incident takes place, it should be quickly established whether a personal data breach has occurred and, if so, appropriate steps should be promptly taken to address it.

The focus of risk regarding breach reporting is on the potential negative consequences for individuals. On becoming aware of a breach, you should contain it and assess the potential adverse consequences for individuals, based on how serious or substantial these are, and how likely they are to happen.

All consumers in scope of this policy have a responsibility to report a suspected or actual data breach. If this is discovered or occurs out of hours then this should be reported as soon as practically possible. This should be done through the completion of the reporting form in [Appendix 1](#), which is sent to enquiries@oldfieldschool.com FAO Business Manager who will liaise with its Data Protection Officer (i-west).

Notify the ICO (if necessary) If the personal data breach is likely to result in a risk to the rights and freedoms of an individual(s), the incident must be reported to the Information Commissioner's Office (ICO), no later than 72 hours after becoming aware of the breach. It is, therefore, crucial that you report any data breach (regardless of the severity) to your Data Protection Officer (DPO) as soon practically possible. It is especially important to report data breaches promptly where there is low staff availability and or a Bank Holiday. The DPO will advise on whether to notify the ICO, however the final decision will rest with the organisation. If a decision to report is made, then it is the organisation's responsibility to liaise with the ICO to ensure the report is sent off.

Notify data subjects (if necessary) If the breach is likely to result in a high risk to the rights and freedoms of individuals then you should promptly inform those affected, particularly if there is a need to mitigate an immediate risk of damage to them. One of the main reasons for informing individuals is to help them take steps to protect themselves from the effect of a breach. When notifying individuals, you should consider including the following:

- Outline what has occurred and apologise.
- Provide name and contact details of lead officer or relevant manager for further information.
- Describe any likely consequences.
- Describe any measures taken or proposed to be taken to address the breach including any measures to mitigate its possible adverse effects.
- Advise whether the ICO has been notified.
- Record notification to the data subject in breach log.

**OLDFIELD
SCHOOL**

5. Monitoring and Compliance

Compliance with this policy shall be monitored through a review process. All personal data breaches (and near misses) should be recorded whether or not they have been reported to the ICO. The breach log will include the facts of the breach, its effects and the remedial action taken. Staff should be aware, that a deliberate or reckless disregard of this policy could result in disciplinary action being taken.

6. Learning from Experience

The relevant manager should, in consultation with the DPO, undertake a review of existing controls to determine their adequacy, and whether any corrective action should be taken to minimise the risk of similar incidents occurring. The review should consider:

- Whether policy controls are sufficient.
- Whether the breach occurred due to system error or human error or both.
- Whether training and awareness can be amended and/or improved (if a report to the ICO is made, they are likely to seek details of training that has been undertaken).
- Where the biggest risks are apparent and any additional mitigations.
- Whether methods of transmission are secure.
- If learning from experience may be disseminated to all staff (where possible without identifying the person responsible).

7. Links with Other Policies

This policy should be read in conjunction with other relevant policies, including but not limited to:

- Data Protection Policy
- Information Security Policy
- Staff Acceptable Usage Policy (AUP)

Appendix 1 – Data Incident Reporting Form

1. About the incident	
Date and time of incident	
Where did the incident occur?	
Date (and time where possible) of notification to the organisation <i>If there was any delay in reporting the incident, please explain why this was</i>	
Who notified us of the incident?	
Describe the incident in as much detail as possible, including dates, what happened, when, how and why? <i>Include names of staff and data subject(s). Identifying information will be anonymised for any reporting purposes.</i>	
2. Recovery of the data	
What have you done to contain the incident? <i>eg limiting the initial damage, notifying the police of theft, providing support to affected data subjects</i>	
Please provide details of how you have recovered or attempted to recover the data, and when <i>Consider collecting the lost data, rather than relying on an unintended recipient to dispose of it</i>	

3. About the affected people (the data subjects)

How many individuals' data has been disclosed?

Are the affected individuals aware of the incident, and if so, what was their reaction?

When and how were they made aware / informed?

Have any of the affected individuals made a complaint about the incident?

Are there any potential consequences and / or adverse effects on the individuals? What steps have been taken / planned to mitigate the effect?
